

## Medisoft Version 20 HotFix update

This HotFix can be installed on all **Windows 10** computers that have Medisoft Version 20 installed.  
This will need to be done under the Administrator account.

This Fixes the below issue on Windows 10 computers:

There is an intermittent issue with Medisoft v20 freezing on startup with some Windows 10 devices.  
If you experience this issue, please install the following hotfix to resolve it.

**Save then install the Hot Fix update** named: **Medisoftv20hotfix.exe**

Close Medisoft & Office Hours before installing.

Save the file to your computer;

Then run on each Windows 10 computer that has Medisoft installed.
