Reminder: Please backup your Medisoft Data Every Day.

Is your data backed up?

How much time will you lose trying to recreate it? Hours? Days? Or maybe never?
Medisoft data is a very important part of your practice accounting.
If for some reason the data files are gone or corrupted, everything must be re-entered.
This might be due to theft of the computer, a fire, storms, a computer hardware problem, etc.…
So a proper backup routine is important.

We recommend daily backups of your Medisoft Data of each practice to an external backup device.
