

## Medisoft Version 24 Upgrades

Medisoft® powered by eMDs is a proven, trusted, and affordable practice management solution designed to simplify the way you run your practice. With each new release it gets better and more powerful as new layers of functionality and usability are added. Here are just a few of the notable benefits of upgrading to Medisoft V24.

### New Transaction Entry Alerts – Cleaner Claims, Reduced Denials, Faster Payments

Claim rejections cost practices money. Staff time to rework denials is time that could be spent elsewhere. The more denials you have, the slower your payment cycle, and likely you will have complete loss of revenue for some denied claims.

Now you can reduce rejections even more with customizable transaction entry alerts that quickly notify your team when something is wrong so it can be fixed immediately by updating the MISSING or INCORRECT information – BEFORE submitting to the clearinghouse. The result: cleaner claims, faster payments, less costly rework, more predictable cash flow.

---

## New Eligibility Display to Improve Practice Collections

A typical Eligibility Response can be difficult to read, takes time to review, and can even lower patient satisfaction when they don't know what to pay. Now you can help your front office team by upgrading to the new easy-to-read format. Benefit information is easily reference in a highly functional screen that speeds up intake, helps you collect the right amount at the time of service, and provides clarity for your patients too.

---

## Multiple Enhancements Including Cases!

Improve patient engagement and collections with the new Medisoft Mobile 3.2 *available only in Medisoft v24.*

- The ability to select a case from the Superbill, Charges, or Appointment screens. You can also pull the diagnosis from the case and display it on the patient preview area.
- New functionality that enables you to edit or delete an existing single appointment directly in the app.
- Easy-to-understand guarantor balance with individual patient detail improves collections by account
- Views for additional insurance information on the patient card, including policy information; the addition of a middle initial to your patient names for easier searching and sorting; plus the addition of facility codes for more accurate facility selection.
