Medisoft Version 24, added a new feature: Transaction Entry Alerts.

This would be a popup window if rules are not met.

There can be many different combinations created such as:

*If an Office Visit & CPT Code 95004 are used together and there is no Modifier 25
there would be a popup message: Use Modifier 25 if Office Visit & 95004 are used together*

Another popup message sample is:

Remove Facility if Insurance is equal to a certain Insurance Code(s)

Or if a Procedure Code requires a certain Diagnosis Code;

Such as needing an Asthma Diagnosis Code

If your practice needs some rules set, we can now add these rules.

Note: This is only for Medisoft Version 24

If you need to upgrade to Medisoft Version 24 please contact our office.

Remember to check your reports

Look at your Clearing House reports to see if your electronic claims were accepted.

If you get a 999 report, this means your entire batch was rejected.
